SPUD MAN

SpudMan is one of the UK's biggest viral food names, best known for the huge queues drawn by his baked spuds and the following he has built.

Jamieson Brothers have partnered with him to create an exclusive seed potato range that brings popularity into the garden market.

For garden centres, this is a strong opportunity to stock something recognisable, conversation-starting and genuinely different from the standard seed potato offer.

ISJ Horticulture are licensed to market the range.
